

# LYON BÉTON

A heavyweight in the flyaway world of design trends, concrete is a material that remains a style constant. French label LYON BÉTON is specialized in the design and production of concrete furniture, accessories and arts. The company has a light-hearted approach and tends to offer items by taking the material to a new level with its unusual designs and specially developed, lightweight and resistant properties.

Combining creativity, aesthetics and functionality, our collections offer a discreet and strong presence to your home.

Today, the company collaborates with artists and designers to create pieces that are just as integral to any living space and long-lasting in every sense.

We are fascinated by the various technical and visual possibilities of this material and for the past 5 years, we have been putting a lot of effort in the creation of a unique kind of concrete, especially developed for the production of furniture. It is reinforced with metal wires and fibres, which allows the concrete to have a very reasonable weight. Our concrete is resistant to all forms of daily aggressions and is easy to maintain.

We take a special care at the finishing, it has to respect the concrete grains and provides a soft and nice touch. As we control all the technical features of the concrete, we are able to offer products with sophisticated shapes who will enhance your home.

Our collections are intensively distributed over the world through our online and physical retail partners. For most of them we had the chance to meet at different fairs where we regularly exhibit: AMBIENTE (GERMANY), ICFF (USA), MAISON&OBJET (FRANCE), TOKYO DESIGN (JAPAN).

Our entire product ranges are also sold directly via our own website [www.us.lyon-beton.com](http://www.us.lyon-beton.com). This is by far the best way to offer high quality products for a reasonable price to the highest number of people.
