

Sutton:

Designed in collaboration with Incorporated Architecture & Design, the inspiration for Sutton came from the handle of an antique Cappuccino machine. This elegant collection has more of what Watermark is known for: detailing like no other in the form of linear knurls. This detail can be seen throughout the collection and is not only visually appealing but tactically appealing as well.

Watermark's TOD Collection

Watermark Designs never rests on its laurels, and the brand's newest kitchen collection is another example of their engineering prowess and willingness to reinvent and rethink faucet design. TOD is a kitchen faucet that incorporates linear valve technology into the handles to provide the perfect solution for home chefs and cooks working in kitchens. The faucet levers are easily turned on/off with just the flick of your hand or wrist; move it forward to turn it on and back to turn it off. Along with the linear valve technology, TOD is designed with a number of extremely precise details, including diamond knurling on the base of each piece which lines up exactly. (The diamond knurling is also incorporated into the accessories, the paper towel holder and soap dispenser.) TOD has a low-profile escutcheon, which gives it a clean look on the counter, but its relatively "beefy" 1-1/4" diameter makes it a focal point. TOD is available with two spout options, the "classic" spout which is available in all 40 finishes, and a pull-out spout available in 13 finishes. Two types of handles are available: single lever (joystick) and widespread.

From left to right: New Shower Door Pulls and Flush Plate Actuator.

Watermark's New Shower Door Pulls

Watermark Designs' new collection of shower door pulls provides beauty and confidence because they are such well-made products. The pulls are constructed of solid brass and are available in 4 standard lengths and four configurations: 6", 12", 18" 24", 1 sided pull, back to back pulls, one sided pull with hook, and back to back hooks. They will coordinate with any existing collections and are available in any of Watermark's 40 finishes.

Watermark's Flush Plate Actuators

Leaving no detail to chance, Watermark Designs now designs and produces brass actuators that fit Geberit wall mount carriers. Available in 3 styles, the brass can be finished in any of Watermark Designs' 40 finishes, matching existing faucets seamlessly. And it's not just the look; it's the feel of pushing brass instead of plastic that provides users with a sense of this well-designed product.

About Watermark Designs

For more than three decades, Watermark Designs has been a leading manufacturer of decorative plumbing fixtures, bathroom accessories, lighting and elegant hardware for the luxury commercial and residential markets. Based in the independent design hub of Brooklyn and made in the USA, Watermark's designs are a reflection of the creative melting-pot from which they hail. As a true-manufacturer, their distinctive product quality is achieved using a combination of hands-on design and development combined with state-of-the-industry equipment. Combining sustainable product design with an eye towards architectural detail, Watermark has worked with some of the world's finest architects and designers, including the renowned Clodagh Design Studio and more recently Mark Zeff Studio on their H-Line collection. The ability to customize and create original product collections to meet client's exact specifications has made the Watermark ID program one of the industry's most successful. Watermark Designs' elite collections have been incorporated into some of the world's most exclusive residences, hotels and high-rises including the Ritz-Carlton, Shanghai; Trump Park Avenue, New York, NY, The Sutton in New York and The Eden Roc Hotel, Miami Beach, FL. Their Brooklyn collection, which was designed in collaboration with INC New York even made its way to the South Street Seaport Museum, where it stood as a timeless piece of Brooklyn-inspired art. With their strong commitment to the environment, Watermark Designs aggressively invests in and develops new products with water-saving features while implementing environmentally-safe manufacturing practices. In 2014, they unveiled a collection called Elan Vital; a completely customizable collection that harkens back to New York's industrial days combined with the best current technology. In 2015, Watermark won the Brooklyn-Made Award presented by the Brooklyn Chamber Of Commerce for manufacturing outstanding, high-quality products to consumers.
