COT Reduces Prices on SMT Nozzles & Consumables

GAINESVILLE, GA — July 2017 — Count On Tools, Inc. (COT), a leading provider of precision components and SMT spare parts, today announced significant restructuring and cost reduction actions that have led to lower prices across the board for its standard SMT nozzles and associated consumables product line. The new pricing took effect July 1st, 2017.

“There is an effort underway in our industry to redefine value,” said Curt Couch, president COT “While some are leading with price, our clients tell us it’s much more than that. They have told us time and again that value is delivered via customer service that prioritizes flexibility and quality, coupled with a simple, straightforward price. We have an award-winning product offering, plus tremendous scalability with the recent expansion of our manufacturing facilities. COT has a unique opportunity to enhance that experience even further with lower pricing for all of our clients.”

COT has recently invested more than \$2 million to expand the manufacturing facility with more space and innovative equipment to reduce costs for customers. The company’s commitment and goal is to be the number one supplier of precision engineered components to a wide range of market sectors. Using only the most advanced CNC and other manufacturing capabilities, COT’s expertise is second to none in quality, price, and delivery. The company aims to pass these advantages and capabilities onto its customers, and in so doing, create long-term relationships, that will enhance and add value to the end users products and services.

Mr. Couch continued: “We’re proud of that quality, and breadth of service we provide. We’ve been investing in the SMT industry for more than 25 years, and our work to push the envelope in this regard will continue as the needs and expectations of customers evolve.”

COT invites customers to contact them today to get the latest product flyers with the new reduced pricing. Customers also can view the entire product catalog online at www.nozzles4smt.com.
