

VERMES Microdispensing opens new Premises in Malaysia

New Corporation:
VERMES Microdispensing Sdn Bhd
Butterworth, Penang, Malaysia

Munich, Germany, October 17th, 2017 – VERMES Microdispensing, the renowned supplier of innovative microdispensing concepts and systems for adhesives, silicones, greases, solvents and other fluids, today announced it has opened its new corporation, VERMES Microdispensing Sdn Bhd, in Penang state, Malaysia. With this move the German-based company continues to follow its strategy to bring its superior microdispensing system solutions and support services to the growing customer base in this region.

South East Asia (SEA) is becoming increasingly important for the microdispensing supplier technology. The rising production output of the electronics industry located in SEA is directly influencing the rise in demand for industrial microdispensing solutions.

While offering a comprehensive global supply and support network, the local presence in Butterworth, Penang will enable VERMES Microdispensing to operate regionally and provide customers with local service and delivery. This results in a higher level of customer focus and the ability to provide urgent response when needed.

VERMES Microdispensing Malaysia is led by Mr. Kesavan Thirumali who was appointed as the Company Director of the new company.

“We are excited to expand our reach in South East Asia,” states Juergen Staedtler, CEO of VERMES Microdispensing. “Combining know-how and innovation, VERMES Microdispensing is able to fully meet the needs of the industry throughout South-East-Asia. For many years our contact-free microdispensing system solutions have set standards in precision, reproducibility and processing of a wide range of media. Increasing our footprint in Penang will contribute to deliver these benefits to our customer base in this area.”

Kesavan Thirumali, Company Director of VERMES Microdispensing Malaysia adds: “The opening of the Malaysian office will bring us closer to our customers and enable us to provide them with dedicated services and support. Our high-precision microdispensing systems will help our customers to speed up their product introductions and boost the performance of their manufacturing processes.”

About us

Headquartered in Germany, VERMES Microdispensing revolutionized microdispensing technology with the introduction of its contact free piezo-based MDS 3000 series in 2001. Today, the company is a world leader in the design and manufacture of innovative microdispensing concepts and systems for adhesives, silicones, greases, solvents and other fluids.

VERMES high precision MDS 3000 valves support modern manufacturing processes across the globe, e.g. for automotive, pharmacology, smart phones, TV sets, lamps, wafers, automated manufacture of LEDs, MEMS components, RFID tags, LC displays and many other electronic devices.

Our systems enable our customers to achieve contact free dispensing of highly viscous media droplets in the micro and nano-liter range at theoretical frequencies of more than 3000 Hz; a rate that is unique in our industry.

VERMES Microdispensing employees are dedicated to providing the best technologies and services to its customers around the world with the ultimate aim of contributing to increased throughput, improved quality and lower production costs.
