TURN ON THE CLEAN

AQUALOGIC FAUCET BRINGS THE PURIFYING POWER OF OZONE WATER INTO THE KITCHEN!

(Hillside, IL) The **AQUALOGIC OZONE FAUCET BY LENOVA®** is an extraordinary feat of science and engineering that is bound to earn the praises of safety-minded consumers everywhere. Its elegant design is notable enough, but what truly sets this faucet apart are the unique sanitation features that bring the power of ozone water into today's home kitchens. Its ingenious design includes a small, thin ozone generator that naturally produces ozone water, a safe yet extremely effective way to clean hands, surfaces and food without chemicals or harmful residues.

OZONE IS MOTHER NATURE'S ANTI-MICROBIAL DISINFECTANT

"Aqualogic is the first sanitizing faucet for household use in the United States," said Jay Beaumont, National Sales and Marketing Manager of LENOVA®. "The potential uses and health benefits are endless, from sanitizing cooking utensils and cutting boards to disinfecting baby toys and binkies. Ozone water can extend the shelf life of food, remove odors and increase the level of protection from food-borne illnesses. The Aqualogic faucet is a great way for consumers to feel confident their kitchens are germ-free and food prepared there is absolutely safe for consumption."

Ozone is a powerful antibacterial agent that oxidizes harmful micro-organisms on contact. Chemical cleaners cannot match its effectiveness; ozone is 100 times stronger than chlorine and kills bacteria 3100 times faster. Ozone kills all common food pathogens, including Salmonella, Norovirus and E-coli, and removes pesticides from fresh produce. With ozone water in the kitchen, consumers can safely eliminate the need for hot water and conventional sanitizers.

All of this cleaning power is packed into a very attractive package. Available in polished chrome or brushed nickel finish, the Aqualogic faucet has a sophisticated silhouette and minimalist style that is well suited for any kitchen décor. It is UPC and NSF certified and is the only ozone faucet tested and certified by the FDA on the market in the US.
