

COMPANY PROFILE

Materia Design is for Rosalba Galati and Laura Santi the result of a shared passion for materials and their pliability. An explorative energy guides both hands and mind towards the creation of jewelry new in shape and perceptually diverse in conception.

Unlike traditional jewelry, its preciousness is obtained through playful creativity and free use of forms.

The two-woman team's exceptional sensitivity to form and detail, their unusual use of materials and contrasts contribute to turning an intuition into a decorative item that surprises, delights and, through its sensorial power, matches the style of the wearer.

From the very beginning, their creations meet a favourable and enthusiastic public response: this positive result together with their love for challenge, lead Rosalba and Laura to better define their project by participating to selected public events which best represent them.

Materia Design jewelry is distributed in Design Stores, Museum Stores and Fashion Stores worldwide.

DESIGNERS

Rosalba Galati, was born in Crotone, studied Architecture at the University of Toronto and the IUAV in Venice. In Canada she worked in fashion, interior and graphic design and collaborated to various architecture and urban planning projects, competitions and production of exhibitions. At Barton Myers Associates she gained her most significant experience, key to defining her approach to design, passion for high tech materials and attention to detail. Returned to Italy, she worked for an architectural firm in Padua and later devoted herself to the design and production of furnishing accessories and jewelry.

Laura Santi was born in Padua, she has a degree in Psychology in the Workplace and has worked as a consultant in human resources and corporate organization for various companies and public bodies. Since 2005 she has branched into the field of design, graphic design, product packaging and marketing. Thanks to her encounter with Technogel®, she has started creating and producing furnishing accessories and jewelry.

PRODUCT DESCRIPTION
Lace PVC Necklace

Resembling delicate woven lace, this lightweight necklace is actually made of durable, pliable PVC with a magnetic clasp. The Lace PVC Necklace reflects the Museum's effort to document the use of innovative and unique materials in design, many examples of which are featured in the Museum's collection.

Gel Bracelets
Materia Design

DESCRIPTIONFEATURESDetailSDeliverability / Delivery

With a tactile quality so inviting, it's hard to resist touching this unique line of bracelets made from molded silicone. Geometric shapes are met with soft curves rather than hard angles in this jewelry collection by Materia Design. Various colors are available, each with a varying level of opacity. For a bold statement, try grouping two or three Gel Bracelets together on your arm.

Serpentina Necklace
Materia Design

DESCRIPTIONFEATURESDetailSDeliverability / Delivery

From the playfully creative two-woman team of Materia Design, the Serpentina necklace exudes an explorative energy through an unusual use of material. A shared passion for materials and their pliability defines Rosalba Galati and Laura Santi's jewelry, as exemplified by Serpentina's soft scrunched leather. This seductive piece snakes sensuously around the neck several times, resulting in a compelling look that can be worn casually or for a formal affair. The Serpentina necklace is available in beige, black, and taupe.

Tris Bracelets
Materia Design

DESCRIPTIONFEATURESDetailSDeliverability / Delivery

With a tactile quality so inviting, it's hard to resist touching this unique line of jewelry made from molded silicone. The set of three bracelets are available in dark blue, green and light blue; red, olive and orange; or transparent, black and grey and make a strong impact when worn together. The gel surrounds the steel connector so that when being worn, there is no visible connection.

Plisse Necklace
Materia Design

DESCRIPTIONFEATURESDetailSDeliverability / Delivery

Unconventional material is softened through a unique application and design in Materia Design's Plisse Necklace. Stainless steel threads are woven into a fine fabric then grouped around an inner core to create a plisse effect. Transcending the barriers of materiality and execution, Materia Design creates a contemporary approach to jewelry with sensibility to form and personification. The refinement of this necklace contrasts with typical jewelry and therefore stands out as an adventurous, eye-catching piece. For simple wearing, the Plisse Necklace features a magnetic closure.

Twist Necklace

Rosalba Galati and Laura Santi's idea of jewelry derives from a sense of beauty that transcends its material and decorative value to become an expression of intrinsic femininity and charm. Unlike traditional jewelry, its preciousness is obtained through playful creativity and free use of forms and materials.

Galati's Twist Necklace is made of rhodium-plated brass tubes and pliable steel mesh that is soft to the touch. Slide-in clasp. Necklace is 23" long and 1.5" wide. Designed and made in Italy.

Spike Necklace - Black

Rosalba Galati and Laura Santi's idea of jewelry derives from a sense of beauty that transcends its material and decorative value to become an expression of intrinsic femininity and charm. Unlike traditional jewelry, its preciousness is obtained through playful creativity and free use of forms and materials.

Their hand-knotted Spike Necklace is made of PVC and other synthetic materials. Magnetic clasp. Necklace is 15" (and don't worry, it's soft to the touch). Designed and made in Italy.

This item is currently out of stock.
