

Find Your Park -World Parks-

Since ancient times, lush green grass in parks has always been attracting people.

People have been spending good times with grass while sunbathing, picnicking, running, and working out on and around it.

There have also been several legendary live music concerts that touched many people's hearts.

Among the world's parks that have been oases for the mind in the busy city, we feature Central Park (NYC), and Hyde Park (LONDON) as new colors in our Parks Series.

We made a case that features perpendicular color patterns carefully themed after each park, and Western-grass textured edges and sides.

We will also be releasing our long-awaited cleaner cloth on the same day.
