

ELITE IRON SHOT SHOW OP-COMP MUZZLE BRAKE NEWS RELEASE

ELITE IRON® Presents the Popular OP-COMP Muzzle Brake in Las Vegas at the 2019 SHOT SHOW January 22 – 25.

Las Vegas, NV / January 22, 2019 - ELITE IRON has been manufacturing highly effective muzzle brakes (or compensators) for many years. But perhaps the most popular and recently developed is the OP-COMP muzzle brake. The OP-COMP is incredibly effective for rifles chambered in .223, 6.5 Creedmore, and .308 calibers. And it is also available for AR 10 model rifles.

The OP-COMP design is patented and virtually eliminates recoil. It is extremely effective for full auto fire and three-gun competition where the weapon must stay on target after each shot. The OP-COMP also helps the shooter be faster on target, quicker with follow-up shots, and smoother on the trigger because the barrel is just not affected by recoil due to the efficiency of the re-directed muzzle gas. The ELITE IRON OP-COMP muzzle brake is made from Chrome molly steel and has become a staple for elite shooters in almost every discipline of shooting.

Visit ELITE IRON at Booth #20311 at the 2019 SHOT SHOW in Las Vegas.

ELITE IRON® has been a premier designer and manufacturer of high caliber firearms equipment and accessories for 17 years. We are especially well known for our professional grade ELITE IRON sound suppressors that are designed to provide enhanced accuracy and superior sound reduction for calibers ranging from .17 HMR through .50 BMG. And we build suppressors for all favorite hunting calibers and wildcat cartridges.

ELITE IRON is located between the rugged mountains of western Montana. The ELITE IRON staff are highly experienced shooters and hunters themselves with extensive knowledge of ballistics, metallurgy, and manufacturing techniques for weapons applications. All of our products are designed and manufactured to a “higher caliber” in Montana adhering to the highest quality standards with meticulous attention paid to detail to assure on-target results.
