Skull Hooker® New Product Release- Turkey Hooker

KLAMATH FALLS, Ore. (Dec. 29, 2018) — Skull Hooker, the world's first professionally finished and fully adjustable European skull mounting system, is now offering additional options for 2019.

The Turkey Hooker is an inspiring new product by Skull Hooker and the first bird display of its kind. This amazing new product allows you to have an attractive and versatile mounting solution for displaying turkey fans.

The Turkey Hooker is sold as a wall display. Features include three tabs on the bottom for hanging/displaying a beard and legs. Like all Skull Hooker brackets, the display is adjustable to get the perfect angle or presentation of your trophy.

The Turkey Hooker is not just your typical turkey fan wall display. It can also be set flat on a shelf or on an office desk. In addition, the Turkey Hooker can be utilized on Skull Hookers' Table Hooker and Trophy tree displays as two more options for displaying those turkey hunting memories.

Headquartered in Oregon and founded in 2009, Skull Hooker was the first company to offer professionally crafted and fully adjustable European style skull-mounting brackets that naturally showcase trophy animals in an elegant manner. The Skull Hooker mounting systems for European mounts were first available in two wall sizes to accommodate most every trophy big game species worldwide. Since then, the Skull Hooker product line for European mounts has expanded into floor and table displays. Skull Hooker also offers two sizes of brackets for Skull Capped trophies along with an optional Skull Cap cover plate. Skull Hooker further expanded to offer two new products providing a third, smaller and sleeker, size option to the classic European wall mount, as well as their first bird display, the Turkey Hooker.
